Get User Profile

Retrieve detailed information about the authenticated user's trading account, including unique identifiers, exchange access permissions, enabled trading segments, and DDPI authorization status.

Python SDK Usage

```
from growwapl import GrowwAPI

# Groww API Credentials (Replace with your actual credentials)
API_AUTH_TOKEN = "your_token"

# Initialize Groww API
groww = GrowwAPI(API_AUTH_TOKEN)

user_profile_response = groww.get_user_profile()
print(user_profile_response)
```

Response

```
{
  "vendor_user_id": "d86890d1-c68d-4ebd-9730-4feee5451670",
  "ucc": "924189",
  "nse_enabled": true,
  "bse_enabled": true,
  "ddpi_enabled": false,
  "active_segments": [
    "CASH",
    "FNO",
    "COMMODITY"
  ]
}
```

Response Schema

Name	Type	Description
vendor_user_id	string	Unique identifier of the user
ucc	string	Unique Client Code (UCC) of the user
nse_enabled	boolean	Whether trading is enabled on National Stock Exchange (NSE) for this user
bse_enabled	boolean	Whether trading is enabled on Bombay Stock Exchange (BSE) for this user
ddpi_enabled	boolean	DDPI (Demat Debit and Pledge Instruction) status. When enabled, allows the broker to debit securities from the user's Demat account for transactions like selling shares or pledging them for margin, without requiring TPIN and OTP authorization for each transaction
active_segments	array[string]	List of trading <u>segments</u> active for the user such as CASH, FNO, COMMODITY etc.
